

# *Fundraiser for Henry Pavitt*

Henry Pavitt is a 2 year old who has been diagnosed with Down syndrome as well as a 20mm hole in the heart. Henry has been tube fed through a peg directly into the stomach since birth. Henry does not know what it feels like to be hungry or how to eat. The best place in the world that can provide a program which teaches children like Henry to eat normally is the Graz Children's hospital in Austria.
